ABSTRACT OF THE DISCLOSURE

A cover for an object using solar radiation includes a cover sheet made of a material transparent to solar radiation, wherein, viewed in cross-sectional view with respect to the sheet, the sheet has a zigzag profiled surface structure on either side. A combination of two covers has cover plates of each of the covers above one another, in particular running parallel to one another. Moreover, a combination of a cover and an object has the cover covering the object and the object uses, absorbs, and converts solar radiation.
